A detailed report is available here: <https://www.australianretirementtrust.com.au/disclaimers-and-disclosures/proxy-voting/proxy-voting-record-history>

---

<sup>1</sup> In certain markets or circumstances, there may be technical issues that can affect the desirability of voting proxies or the ability to vote proxies (shareblocking provisions, restrictive power of attorney requirements, conflicts of interest, sanctions regimes, etc.). There are also several other voting options (like say-on-pay frequency votes).

<sup>2</sup> Environmental-related shareholder proposals are as defined by Australian Retirement Trust's voting agent, CGI Glass Lewis. More information on its approach to environmental and social issues can be found here: <https://www.glasslewis.com/wp-content/uploads/2023/11/2024-Shareholder-Proposals-ESG-Benchmark-Policy-Guidelines-Glass-Lewis.pdf> (accessed 15 August 2024). We may vote on proposals that are pro-ESG, anti-ESG, and/or anti-social (also known as "Trojan horse").
